

TagTeam[®] Soybean Peat Inoculant

soybean

ATTENTION:

This specimen label is provided for general information only.

- This biological product may not yet be available or approved for sale or use in your area.
- It is your responsibility to follow all Federal, state and local laws and regulations regarding the use of biologicals.
- Before using any biological, be sure the intended use is approved in your state or locality.
- Your state or locality may require additional precautions and instructions for use of this product that are not included here.
- Monsanto does not guarantee the completeness or accuracy of this specimen label. The information found in this label may differ from the information found on the product label.
- You should not base any use of a similar product on the precautions, instructions for use or other information you find here.
- Always follow the precautions and instructions for use on the label of the biological you are using.

TagTeam[®] Soybean Peat Inoculant is a DUAL-ACTION inoculant combining the phosphate-solubilizing microorganism *Penicillium bilaiae* with nitrogen-fixing rhizobia. Together they can create more fixed nitrogen and better access to soil and fertilizer phosphate, providing the best yield.

MINIMUM GUARANTEED ANALYSIS

ACTIVE: 8.0 x 10⁵ cfu/g *Penicillium bilaiae*
8.0 x 10⁸ viable cfu/g *Bradyrhizobium japonicum*

INERT: Sterilized milled peat with natural graphite, calcium carbonate, and a water based medium (containing sucrose and yeast extract)

NONPLANT FOOD INGREDIENT

Not a fertilizer substitute

Warning

May form combustible dust concentrations in air [with packages greater than 25 kg].

Read this entire label before using the product. Use only according to label directions.

How it Works

The active ingredients in TagTeam Soybean Peat Inoculant are the bacterium *Bradyrhizobium japonicum* and the soil fungus *Penicillium bilaiae*. *Bradyrhizobium japonicum* forms root nodules which convert or fix nitrogen in the air into forms the plant can use. *Penicillium bilaiae* grows on plant roots and makes less available residual soil phosphate available for crop use.

Directions for Use

TagTeam Soybean Peat Inoculant can be applied as a dry application or applied to pre-moistened seed. TagTeam Soybean Peat Inoculant may be applied when transferring seed from the bin to the truck, or from the truck to the tank or seed cart. This product may also be applied directly to seed in the tank or seed cart. TagTeam Soybean Peat Inoculant should be mixed thoroughly with the seed and the seed should be evenly coated. TagTeam Soybean Peat Inoculant seed should be planted within 48 hours.

For Best Results:

- Double inoculation, the act of using a double application of a rhizobial inoculant, is recommended in certain soil conditions (such as when planting on land previously used for pasture or planting soybean for the first time).
- Double inoculation can be achieved by application of any combination of liquids, peat powders, or furrow-applied liquid or granule rhizobial inoculants that are labeled for the target crop.

For additional information, please see

<http://www.monsantobioag.com/global/us/Pages/Double-Inoculation-for-Soybeans.aspx>.

Dry Application:

- Pour the correct amount of TagTeam Soybean Peat Inoculant into drill hopper, as referenced in Table 1. Mix thoroughly.
- For bulk systems, TagTeam Soybean Peat Inoculant can be directly metered onto seed.

Slurry Method Application:

- Mix TagTeam Soybean Peat Inoculant with cool, clean, non-chlorinated water and apply to seed as a slurry, as referenced in Table 1.

Table 1. Application rates and bare seed planting windows

Crop	Seed inoculated by one bag	Approximate water volume	Planting window (bare seed)
Soybean	907 kg (2,000 lb, 33 bu, 40 units) soybeans or 5,600,000* seeds *based on 140,000 seeds per unit	3.0 litres (3.2 US quarts)	48 hours

TagTeam[®]

Soybean Peat Inoculant

Seed treatment recommendations

- Application with other seed treatments is possible, but may reduce the planting window. For up-to-date pesticide compatibility information, please call Monsanto Company at 1-877-775-8787.

Where to use for maximum benefit

- Best nitrogen responses to TagTeam Soybean Peat Inoculant occur in soils that are low in available forms of nitrogen and populations of *Bradyrhizobium japonicum*.

Benefits of using TagTeam Soybean Peat Inoculant may be limited on:

- Soils with high nitrogen levels or with high application rates of nitrogen fertilizer;
- Soils that have been heavily manured (likely to be high to very high in available phosphate);
- In soils that do not tie up phosphate, i.e., very sandy soils (greater than 85% sand) and soils that contain more than 14% organic matter.

Applicators and Other Handlers

The active ingredients in TagTeam Soybean Peat Inoculant are *Penicillium bilaiae* spores and *Bradyrhizobium japonicum* viable cells. Eye or skin contact, inhalation, or ingestion should be avoided. Wear standard protective clothing and equipment including gloves, safety glasses. Ensure adequate ventilation. Where exposure through inhalation may occur, use respiratory protective equipment. This product contains microorganisms that may have the potential to provoke sensitizing reactions; use appropriate personal protective equipment (PPE) to reduce exposure. Sensitized individuals should wear an NIOSH-approved respirator. In case of contact with skin or eyes, immediately flush exposed areas with plenty of water. Get medical attention if irritation occurs.

Storage and Disposal

The active ingredients in TagTeam Soybean Peat Inoculant are living organisms and require specific storage conditions to ensure viability and product performance. To maintain product viability:

- Store TagTeam Soybean Peat Inoculant bags under cool conditions <68°F (20°C) away from sunlight and direct heat sources.
- Minimize temperature fluctuations.
- Avoid freeze/thaw cycles.
- Use entire contents of bag after opening.
- Use before the expiration date. The expiration date is valid only for unopened bags stored under the conditions listed above.

Unused TagTeam Soybean Peat Inoculant should be disposed of in accordance with applicable federal, state/provincial, and local requirements. Seed treated with TagTeam Soybean Peat Inoculant is not recommended for food, feed or oil purposes.

To ensure proper labeling for your state/province, please go to: www.monsantobioag.com

Limited Warranty

The Seller warrants that this product contains a minimum number of *Penicillium bilaiae* and *Bradyrhizobium japonicum* viable cells, as specified on this label. The Seller makes no other warranty expressed or implied as to product viability or performance since product storage, use and growing conditions are beyond the Seller's control. Seller's guarantee is limited to the terms set out on the label and subject thereto. Buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition. If this product does not perform as warranted above, and to the extent consistent with applicable law, customer's sole remedy for breach of warranty shall be replacement of the product or refund of the purchase price paid, at the option of Monsanto Company.

EXCEPT AS PROVIDED ELSEWHERE IN WRITING CONTAINING AN EXPRESSED REFERENCE TO THIS WARRANTY AND LIMITATION OF DAMAGES, SELLER MAKES NO OTHER EXPRESSED OR IMPLIED WARRANTY OR GUARANTEE TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, INCLUDING ANY OTHER EXPRESSED OR IMPLIED WARRANTY OF FITNESS OR OF MERCHANTABILITY, AND NO AGENT OF SELLER IS AUTHORIZED TO DO SO.
